**ADJUSTABLE CRANE HOOKS**

**BFS crane hooks effectively transform a forklift into a mobile crane, handle awkward loads which cannot be safely handled by a conventional forklift with great efficiency. They have excellent strength:weight ratios. All crane hooks are supplied complete with safety swivel hook and shackle.**

**Its position along the forks can be easily adjusted, but not to be used on the taper.**

**“PB” denotes plain bearing hook**

**“BB” denotes ball bearing hook (for easier load rotation)**

**A simple low cost means of “craning” loads. Clamps directly onto parallel section of fork blades.**
