ANTI SLIP FORK COVERS

Manufactured by BFS the same length as your existing forks, robust specially fabricated steel channels available in any length, topped with a number of steel reinforced polyurethane panels, anti-slip, protective, cut and wear resistant. Ideal for handling steel stillages, painted or delicate loads.

Covers will increase your fork thickness by 23 mm on forks up to 40 mm thick and by 20 mm on thicker forks.

Covers for narrower, wider or longer forks to special order.

Covers up to 2000 mm are retained onto forks by integral stirrups (slid on at an angle and lowered to retain). Longer covers retained by heel pins.

Also available as Anti-Slip Fork Extensions to special order.
