CARRIAGE MOUNTED CARPET/COIL BOOMS

Designed to handle cylindrical products. Can be manufactured in any length and diameter and to suit any type or capacity of forklift.

Booms are individually designed to suit both the forklift and the application. Special design features include: wide top hooks for optimum stability, extra thick and narrow back plates for longer life and maximum view of load, bottom hooks clamp boom firmly to truck carriage. High tensile poles are pressed into back plates to eliminate fatigue stresses caused by welding.

Available up to 4 metres long and 50 mm to 400 mm in diameter.

The table below shows our standard popular carpet booms. Usually, the pole needs to be 0.75 x carpet length eg. 4 mtr carpet = 3 mtr boom. 5 mtr carpet = 3.75 mtr boom

Model	Mounting Class	Useable Length MM	Pole Diameter MM	Lost Load Centres MM	SWL KGS at 2000 MM Load Centres	SWL KGS at 2500 MM Load Centres	Centre Of Gravity MM	Attachment Weight KGS	Pole Centre to Ground MM
