MILK CRATE HANDLERS

FOUR PRONG

SIX PRONG

The BFS type 3MT range of milk crate handlers is a very well proven design. The design evolved from experience gained, from 20 years of design, manufacture and repair of milk crate handlers.

Many 3MT's in use today are over 20 years old, proving our commitment to quality, reliability and serviceability.

The "3MT" is Britain's most popular crate handler. Why? :

They are completely serviceable.

Unique taper fit high tensile tines, which do not work loose, and are purpose machined to minimise bottle damage.

Tines are "pitched" to lean crates together, improving load stability, allowing greater handling speeds, reducing driver and truck hours.

Tines are mounted low down, enabling pallets to be lifted.

Back plates: (a) have replaceable tine holders. (b) specially shaped for optimum driver visibility (minimising breakages/driver damage), (c) pre-drilled for optional bolt on load guards (cheaper makes are welded on) and (d) super slim, bringing the load closer, enabling smaller, cheaper forklifts to be used.

Options -

Replacement Tines

Bolt on Load Guards

Stabiliser load guards, have two hinge up tines which enter the top crates

Model	Capacity kgs at 540 mm Load Centres	Tine Length MM	Tine Section MM	No of Tines	Carriage Class	Weight KGS	C of G MM	Lost Load Centres MM
3MT/4	1100	1130	50 x 25	4	2A	145	205	90
3MT/6	1650	1130	50 x 25	6	2A	228	190	90
