REVERSIBLE SNOW PLOUGH CLEARS SNOW BOTH LEFT AND RIGHT!

STANDARD

EXTRA WIDE FRAME

- * **SAFETY-** Impact protection – flexible, bolted on polyethylene dish protects the operator, forklift, plough and surface.
- * **VERSATILITY** – clear snow to the left or right by simply turning over.
- * **DURABILITY** – galvanised fixed angle body with zinc plated “T” bolts.
- * **EFFICIENCY**– snow flows off polyethylene better than steel.
- * **FLEXIBILITY**– polyethylene dish will not become permanently bent upon impact.
- * **RELIABILITY**– dish is reversible, replaceable and will never rust.
- * Dish nominal 450 mm high x 20 mm thick x 1500, 1750 and 2000 mm widths.
- * Dish widths up to 5000 mm available on extra wide frames.
- * Wide fork pockets accept up to 150 x 65 mm section forks.
- * Lightweight – so simple to fit and secure, 1500 mm wide only 70 kgs!
- * Minimum gap required between forks – 450 mm.
